

## About Us

Syncomech is an independent Malaysia based company, specialising in the synchronization of material handling flow from production process to warehousing process, by implementing a simple and flexible mechanism.

With our product range and standard component, a number of applications can be designed and created, tailored to our valued client's requirement, and application condition.

We are ready to work as a partner with our clients, to develop and implement an innovative design concept, in order to achieve the manufacturing objective.

### Company Profile

บริษัท ซินโคเมค (ประเทศไทย) จำกัด

**Company Address** : 70/10 Moo.4 Teparak Road, T.Bangpleeyai A.Bangplee, Samutprakarn 10540  
70/10 หมู่ 4 ถนนเทพารักษ์ ตำบลบางพลีใหญ่ อำเภอบางพลี จังหวัดสมุทรปราการ 10540

**Contact Detail** : Tel : 66 (0) 2 753 3605-4  
Fax : 66 (0) 2 753 3606  
Email : admin@syncomech.com, sales@syncomech.com  
Website : www.syncomech.com

**Main Product** : 1) Pipe and Joint Racking System - *Part Sales, Assembly, Concept Proposed*  
2) Material Handling Equipment - *Belt Conveyor, Roller Conveyor, Ball Transfer*  
3) Customised Product - *Steel Rack, Steel Trolley, Plywood*

**Origin of Product** : 1) Pipe and Joint Racking System - *Malaysia, Korea, Thailand (depend part)*  
2) Material Handling Equipment - *Thailand*  
3) Customised Made Product - *Thailand*

Pipe and Joint Racking System

Pipe and Joint Racking System

Pipe and Joint System is a FLEXIBLE and DIY system consists of pipe, joint and specialized accessories, assembled in a variety of configurations to serve various function. It is commonly used as storage and handling equipment including rack, shelf, workstation and trolley. We have a wide-range of pipe and joint system, applicable in diverse industries application, including ESD conductivity to remove static electricity, or for "anti-dust" application. It optimizes your production efficiency and space-saving where rack, trolley or working table can be easily formed based on your specific application requirement or your desired design.

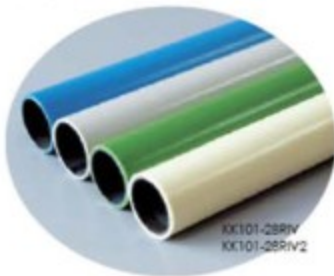

Easy for Assembly and Modify

Standard Part and Components

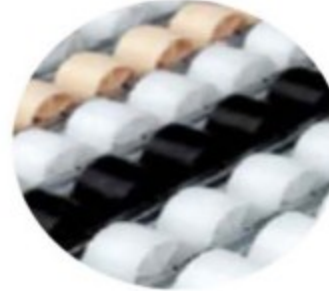

Pipe

Metal Joint

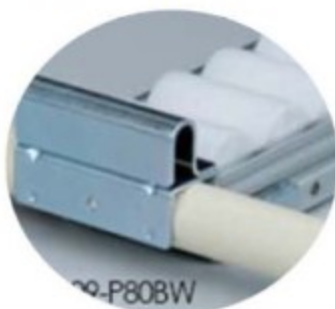

Placon

Plastic Joint

Placon Support

Accessories

Caster

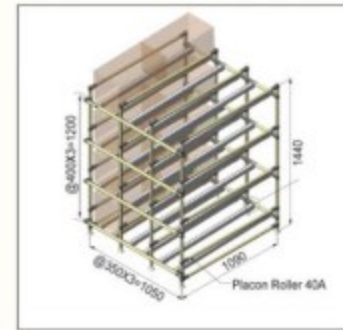

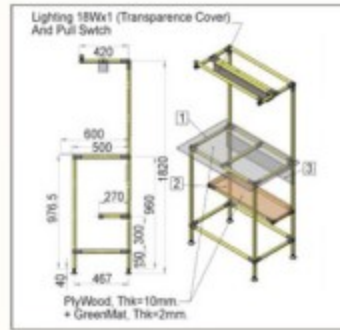

Other Material

Plywood,  
Green mat,  
Protection  
Sheet

3D Concept Design

Pipe and Joint Application

**Logistic System**

With the fast-moving inventory control, Pipe and Joint Storage System able to provide flexible storage equipment to fit for difference box size.

**Work Station**

Ease to access assembly components and easy to change to suit for fast-changing production floor. Available with lighting and Antistatic Material

**Trolley / Cart**

Ease to move WIP product to next Assembly point. Able to carry any size of products designing with your load and special handling requirement.
